

ХОПЕРЫ

OUR STORY.

THE STRIVE TO PERFECTION

GILLES products are some of the finest motorcycle accessories on the market. The company was founded in a small town in Germany by former motorcycle racing driver Gerhard Gilles. The aim was creating exclusive ergonomic products providing technical solutions and original design. Thanks to it's strong inhouse capability in manufacturing high-quality parts, the company rapidly grew into one of the leading brands for motorcycle accessories. Today we believe in successfully combining functionality and creativity with our know-how.

Passion, precision and innovation are the three essential goals that highlight the creative expectations of Gerhard Gilles. For over twenty years, the history of our motorcycle accessories had been marked by innumerable masterpieces giving a contemporary style and spirit for all motorcycle enthusiasts out there.

High importance to details is given to every product leaving our Luxembourg based factory so that our demanding standards of functionality and outstanding quality are met. Gerhard Gilles continually strives to perfection and extends his research into every single motorcycle component, constantly refining the essential link between cutting-edge techniques and traditional craftsmanship.

All unique products invented by GILLES are designed and developed inhouse by our engineering staff. From the simple drawing board draft started by a great idea to the final execution, following various stages of prototyping, right through monitoring the production – every stage of manufacturing is executed to its successful completion.

Since 2000, GILLES has become a name which stands for unique products which are Driven By Function and serving the entire motorcycle market.

Since its creation, the first GILLES product AS31GT rearset was very unique. Indeed, the accessories branch was still in its very early stages but very open for innovation, especially for racing equipment. It was a logical move to introduce a new concept to the market: an adjustable rearset which allows each motorcycle rider to adapt it to own needs and requirements – a milestone.

For GILLES this quickly became a great success and a way to express its unique identity, assert its DNA and demonstrate the know-how.

Always providing clever function, stunning details and a high degree of adjustability options, GILLES is very proud of each single product.

Gerhard GILLES
(Chief Executive Officer)

COMPANY HISTORY.

6

MUE2.GT
REARSETS

HOW IT ALL STARTED

Having been a rider for ten years in several racing classes, the company founder Gerhard Gilles realized that standard parts didn't meet his expectations. He wished for adjustability and needed better ergonomics so he made the beginning:

Gerhard Gilles then produced the first adjustable lightweight rearsets himself for use on his track bike. The paddock became quickly attentive and this was the next step of Gilles successful history. Many more rearsets have been produced to help other riders.

The direction became clear what to do after the racing career. In the year 2000 the GILLES company was founded to combine passion for racing with technical knowledge and experience. This resulted in the development and production of the first multivariable rearset, the AS31GT.

This first rearset kick-started a dynamic company which today sells a wide product range worldwide.

KNOW-HOW.

COMPANY PHILOSOPHY

Exclusive quality accompanies us throughout the entire development process, from the first sketch to the final test.

We do not only focus on design or aesthetics. Our engineering skills are reflected in all parts. Impressive and unique products.

THE INDIVIDUAL TOUCH.

COMPLETED BY YOUR HANDS

Every customer is unique to us, also the individual wishes and needs. What does that mean for us?

Function combined with our design, which gives each individual component a distinctive touch. So each milled part has a special status – just like you.

ORIGINAL EQUIPMENT.

TOGETHER WE CREATED SOMETHING SPECIAL

14

Passion, visions and our high-class products enabled us to move forward, discovering synergies with leading manufacturers in the motorcycle industry.

These cooperations with new inputs rapidly grew and resulted into unique selling points for our partners.

BUSINESS COOPERATION & PARTNERSHIPS

The motorcycle rider is a demanding customer in terms of individualism and desired ergonomics, this was also discovered by the leading manufacturers in the motorcycle industry.

The demand was enormous so that the next logical step was clear, supplying our products directly to the motorcycle manufacturers allowing them to offer exclusive accessories to their customers.

15

OUR PARTNERS.

**BMW
MOTORRAD**

PARTNER SINCE 2005

In that year we started the very first partnership with a motorcycle manufacturer. It was the beginning of an all-German collaboration.

The latest high light of this trustful cooperation is the BMW M1000RR, equipped with M parts made by GILLES and carrying our logo on the fairing.

GILLES
Driven by function

**ORIGINAL
EQUIPMENT**

OUR PARTNERS.

PARTNER SINCE 2012

Our next cooperation started with the famous Yamaha MT series. Today we are supplying rearsets and many other parts for almost each bike category to Yamaha Motor Europe.

Our latest very special and exclusive project was creating the GYTR race line accessories to upgrade the track performance.

OUR PARTNERS.

20

PARTNER SINCE 2015

With Suzuki, another Japanese manufacturer became our valued partner. We are proud to manufacture parts for the GSX-R series and current for their famous Hayabusa.

 **GILLES**

EQUIPMENT

TEAM SUPPORT.

WHY WE DO RACING?

The roots of GILLES lie in racing. We always kept close ties to racing and have been supporting world class teams ever since our foundation.

The feedback from the racetrack influences all our products. The high number of World Champion titles reflect our competence. Also this year we are represented as a sponsor in many racing series.
