THE NOLAN COMPANY

Nolan had been established in 1972 by Mr. Lander Nocchi, a pioneer, an entrepreneur, a man who represented Italian elegance and had a visionary outlook. Today we represent excellence in the helmet manufacturing industry, the perfect duality among Italian design and engineering. The Company is situated in Brembate di Sopra, Bergamo, with a breathtaking view of the Alps. Here is where Nolan handcrafts its appreciated helmets. More than 33.000 square meters of spaces that embrace two specialized production lines, carbon fiber and polycarbonate, two internal Research & Development Departments, an Atelier for special projects. Quality Control department, offices and laboratories. Concept, production, assembling and delivery. The full supply chain is concentrated in the Italian headquarter and from Brembate reaches over 71 Countries in the world.

VALUES

Welcome to the world of Nolan, where Italian style collides with cutting-edge technology to create an ownership experience unlike any other. Each helmet is not only a protective gear but also a statement of elegance and expression of personality, ensuring that you look good while feeling good.

Our core values are built on a foundation we call “Elegance in Engineering”: the seamless blend of beauty and brains.

At Nolan, engineering is an art form. Our helmets are designed with the highest level of precision and innovation, providing unrivaled protection and performance. We ensure that every helmet fits like a second skin, offering comfort and safety without compromise. In every moment of your life and every journey: from challenging daily commuting to thrilling high-speed adventures and leisurely explorations.

Drawing on over 50 years of experience and the rich heritage of Italian artisanship, craftsmanship is at the heart of our manufacturing process. Each Nolan helmet is crafted with meticulous attention to detail, representing the exceptional quality and excellence of “Made in Italy” on the world stage.

Redefine your elegance and become the ultimate trendsetter: fulfill your style, choose your accessory, wear your next Nolan helmet.

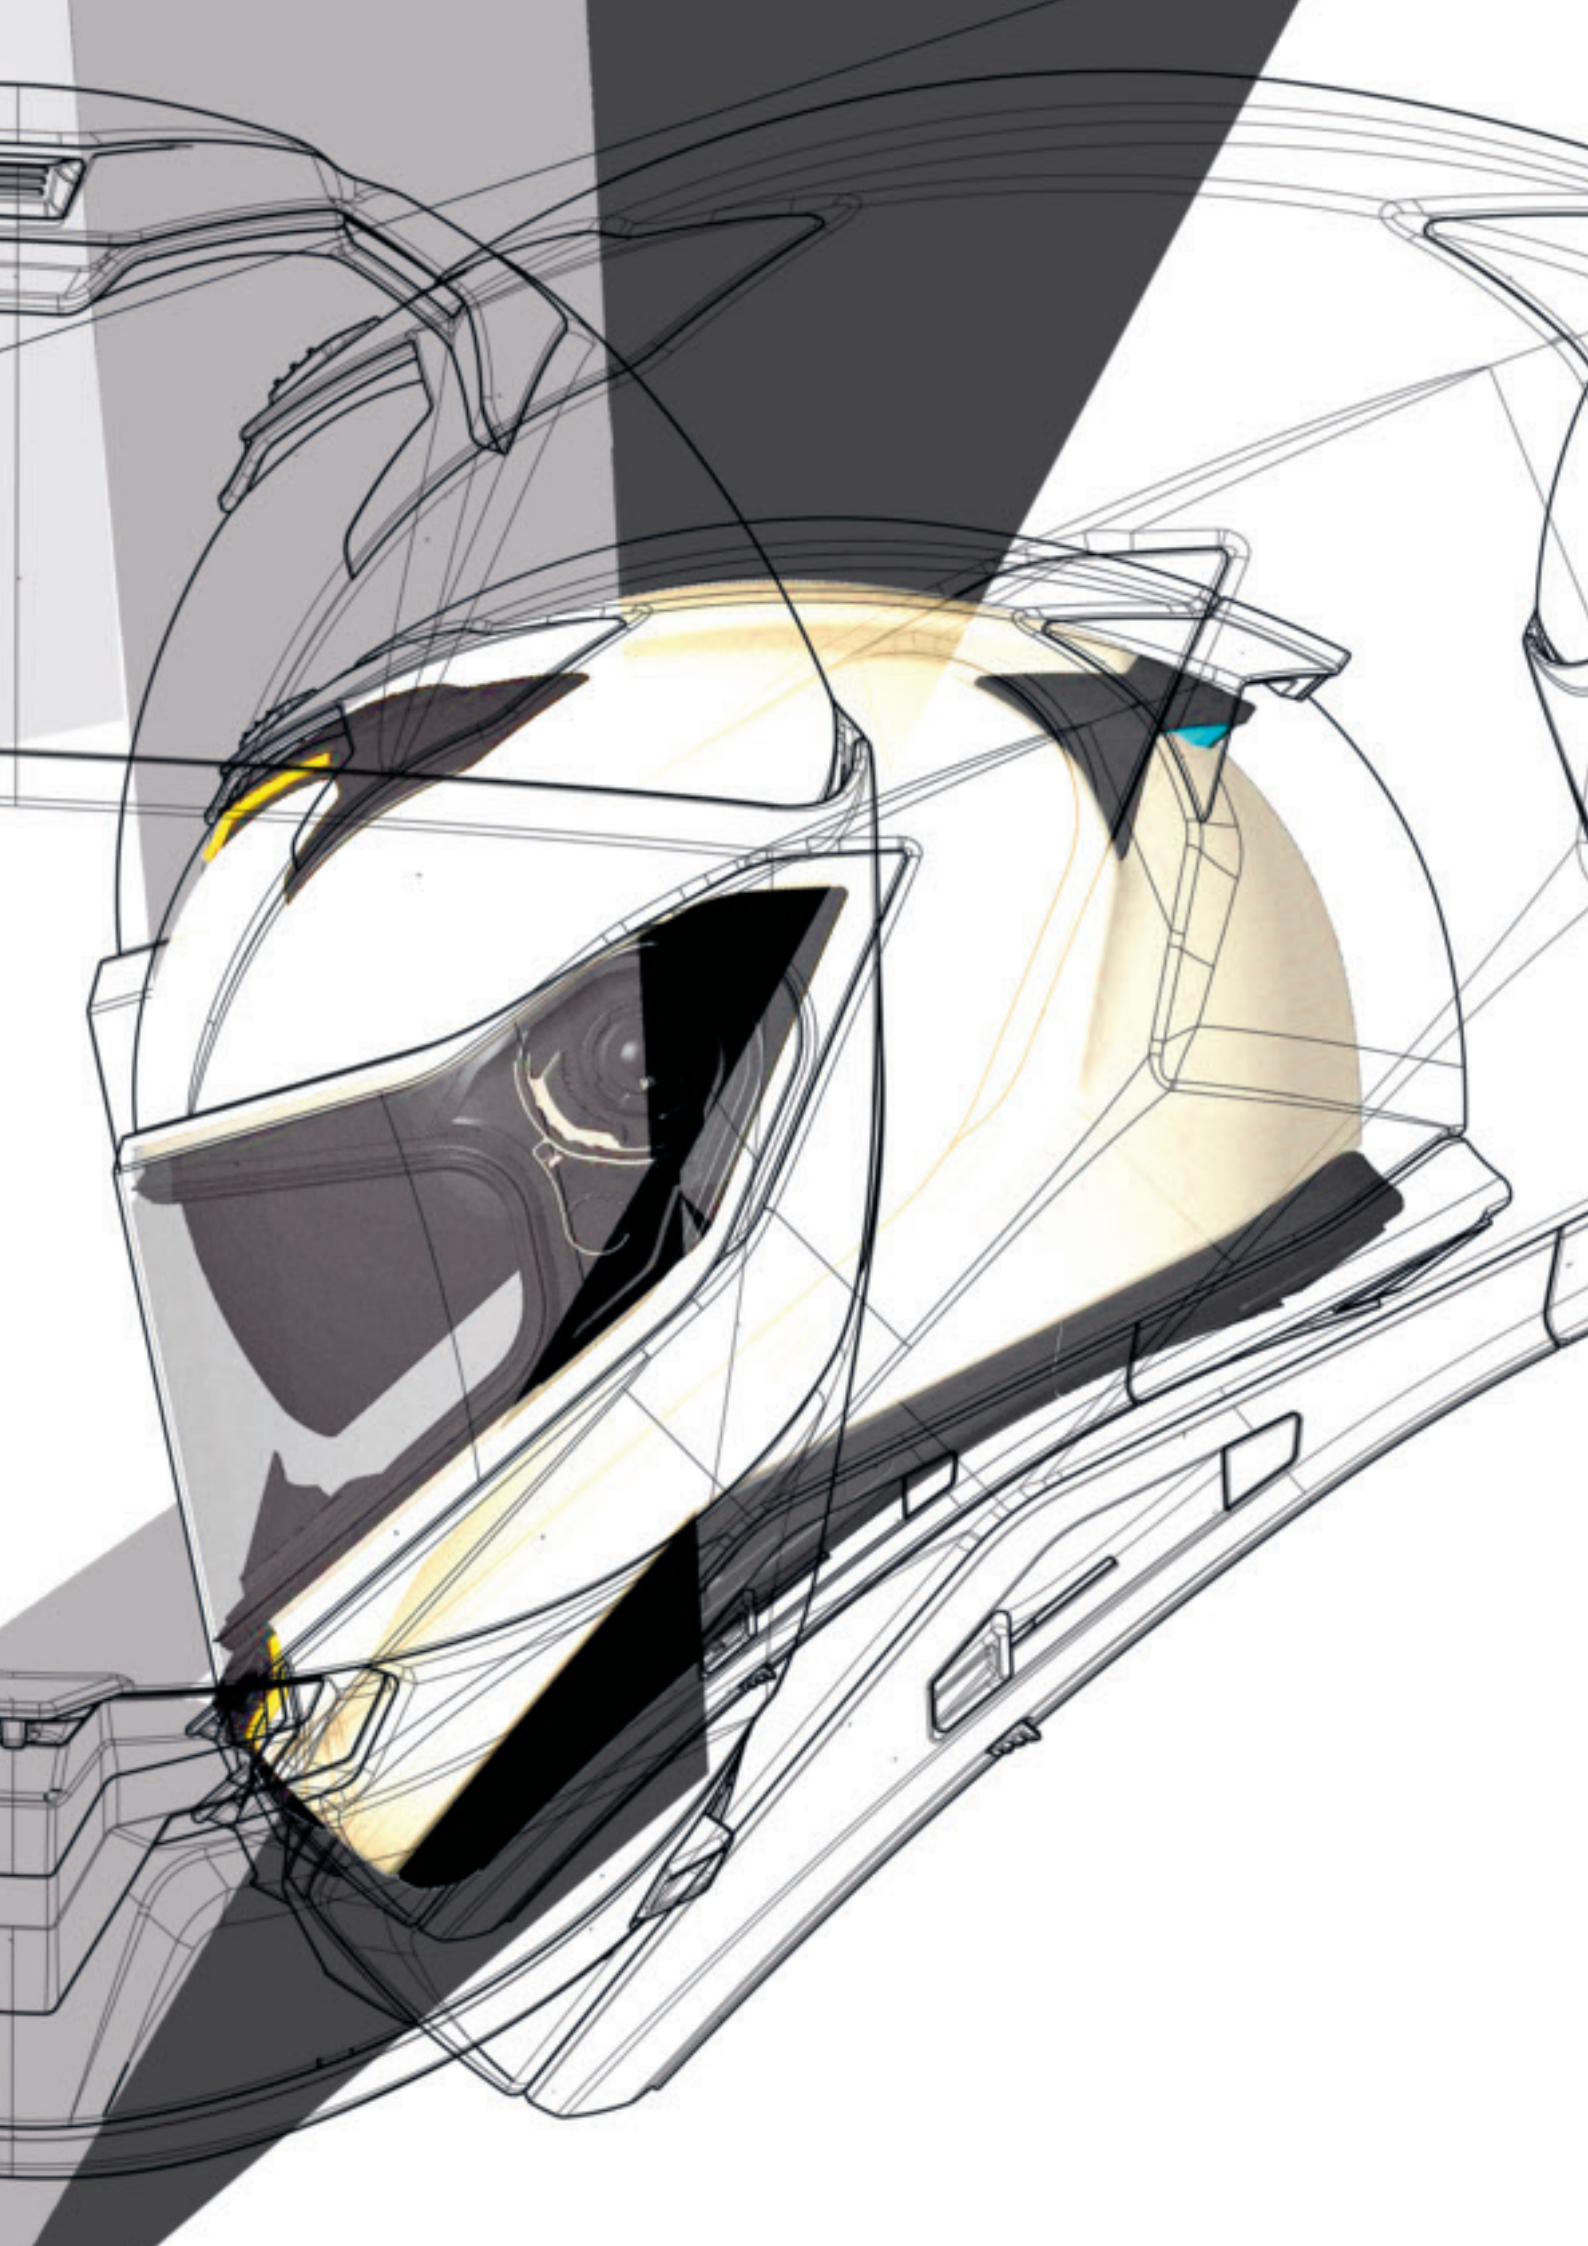

NOLAN

EMBRACE TOMORROW

At Nolan, we don't just anticipate the future; we build it. With the launch of our 2026 helmet collection, we invite you to Embrace Tomorrow, challenging every expectation for safety, comfort, and design. The future is undeniably bright, and for us, it begins now, meticulously crafted in our factory in Italy.

Our mission is clear: to inspire riders through groundbreaking design and pioneering technology, to innovate solutions that precisely meet every rider's needs, and to elevate the riding experience with premium helmets. This unwavering commitment drives us to develop the finest technologies and select the most advanced fabrics, ensuring we consistently deliver the ultimate answer to your demands on the road.

CUTTING EDGE TECHNOLOGY

Nolan Technology: Engineering Your Ride, Elevating Your Experience.

From day one, the entire Nolan team, and especially our dedicated R&D specialists, has been driven by a singular commitment: to imagine and create the most innovative and intuitive solutions for every rider's needs.

Our ultimate goal is simple – to empower you to maximize the joy of every ride, to feel utterly confident, and to remain fully focused on the open road ahead.

At Nolan, our technological focus centers on three pillars: uncompromising safety, supreme comfort, and seamlessly integrated smart technologies.

We believe that technology is far more than a mere gadget; it represents a constant, evolving dedication, perfecting the smallest details and pushing towards groundbreaking innovations. It's all designed to make your riding experience not just better, but truly exceptional.

Crash Detection ①

Emergency Response ②

Advanced Analytics ③

INTELLIGENT SAFETY TECHNOLOGY

Quin Pod is now available within Nolan helmet model X-904 UC.

Quin's intelligent technology is meticulously designed to analyse the nature of impacts and crashes, and automatically call for help if the rider is in need. Quin specialises in advanced safety systems that transform these helmets into intelligent safety wearables.

CRASH DETECTION

Engineered for accuracy, the Quin Pod measures motion and forces in three dimensions, 1000 times per second, vigilantly monitoring the rider's safety. Movements and impacts are instantaneously processed by the Quin's intelligent safety algorithms, which are developed to accurately differentiate between minor bumps and dangerous accidents.

EMERGENCY CONTACT ALERTS

Whether it's a crash or a manually triggered SOS Beacon, Quin's system is designed to instantly alert the rider's three chosen emergency contacts—keeping their trusted circle informed when it matters most.

EMERGENCY SERVICES INTEGRATION

For riders who prefer professional response, Quin's optional ResQ service can send crash alerts directly to emergency services, delivering mission critical data in real time. ResQ is designed to assist in delivering help that is not only fast—but accurate and tailored to the situation.

DIGITAL MEDICAL ID

Quin's Blue Diamond features built-in Tag technology that securely stores the rider's medical ID and critical information. In an emergency, anyone can simply tap the Tag with a smartphone to instantly access vital details—and automatically and securely alert the riders emergency contacts and first responders.

IMPACT DATA

Quin gives riders and their trusted circle access to powerful safety analytics—providing meaningful data when it's needed most. In the event of an impact, Quin provides detailed analysis including impact location, g-force, rotational acceleration, and other key indicators to help understand what happened.

PERFORMANCE ANALYTICS

Riders can access a wealth of performance data from every ride, tracking speed, both max and average, cruising time, distance, consistency, hard-braking and rapid acceleration.

1000 TIMES / SEC IMPACT DETECTION

UP TO 6600 TIMES / SEC MOTION SAMPLING

IP67 WATER & DUST PROOF

FOTA FIRMWARE OVER THE AIR UPGRADES

DUAL ACCELEROMETERS TEMPERATURE SENSOR GYROSCOPE

IRID® LC ELECTRONIC VISOR

INSTANT PHOTOCHROMIC

IRID® visor is able to instantly and automatically adapt its tint to ambient light in less than 1 second. It guarantees the perfect light filter at all times, without batteries.

ECE 22.06 compliant (daytime use), IRID® visor is a real breakthrough in comfort and safety. Designed in Italy.

AVAILABLE FOR X-804 RS UC

CODE: SPLCV00000001

0.09 SECONDS

IRID® visors are able to adapt their tint to ambient light in 0.09 seconds, more than 120 times faster than a regular photochromic visor.

NO BATTERIES

Not even a small one. No battery means it is durable and light like a normal visor. You can use it 365 days a year H24 without any kind of maintenance.

INTEGRATED ANTI-FOG

Thanks to its anti-fog treatment, IRID® guarantees up to 120 seconds of fog resistance: the most performing anti-fog on the market.

100% WATERPROOF

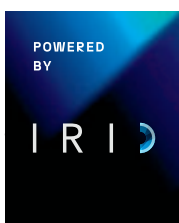

Light is unpredictable, but so is the weather! IRID® visors are completely waterproof, so you can enjoy your ride, without worrying about anything.

ECE 22.06 APPROVED (DAYTIME)

60% - 20% VLT (VISIBLE LIGHT TRANSMITTANCE)

.1 TOP CAP

Enhanced Air Circulation: the open mesh fabric construction maximizes airflow between the helmet's air intakes and the rider's head. Adaptable Fit and Premium Comfort: achieve a precise and comfortable fit with the Liner Adjustable Fitting (LAF) system, featuring 4 removable, breathable padding foams (top, lateral, and rear) offered in 3 distinct thicknesses (5mm – 8 mm and 13mm).

.2 INNER COMFORT

The soft, durable, and breathable polyamide fabric, interwoven with carbon fibers, delivers a premium solution for thermo-regulation, rapid moisture wicking, and anti-static control.

.3 CHEEK PADS

Anatomically shaped cheek pads with removable and customizable padding available in three sizes. The pressure is distributed homogeneously for premium comfort and fit. The beard area features a polyamide Sakura fabric ensuring both comfort and resistance to wear. Equipped with a patented release system, the helmet can be safely detached in emergency situations. Equipped with the patented - Nolan Emergency Release System (NERS) - the helmet can be safely detached in emergency situations.

WASHABLE

.1 TOP CAP

Mesh fabric construction enhances internal airflow, effectively regulating temperature within the helmet. N120-1, N100-6, N70-2X and N80-8 incorporate the exclusive Liner Positioning Control (LPC) system, enabling fine-tuning of the liner position to achieve an individualized and secure fit.

.2 INNER COMFORT

Crafted from premium Italian recycled polyamide, this fabric offers a soft feel and excellent breathability, to guarantee good temperature management and soft comfort.

.3 CHEEK PADS

Constructed with durable and soft premium Italian polyester fabric in the abrasive beard area, this helmet includes removable padding for convenient liner maintenance. The N80-8 equipped with the patented - Nolan Emergency Release System (NERS) - the helmet can be safely detached in emergency situations.

I-ESS INTEGRATED LED

AVAILABLE FOR X-904 RS UC

I-ESS - INTEGRATED LED : BETTER VISIBILITY, SAFETY IMPROVED

Integrated LED lights in the front and back air intakes of the helmet significantly improve your visibility at night and in low light conditions.

As an added safety feature, the rear LED also serves as a brake light, alerting other drivers.

BRAKING MODE

Integrated accelerometer will activate flashing light in case of braking; the LEDs will flash for few seconds.

The braking mode works in complement on position light mode or intermittent light mode.

POSITION LIGHT MODE

Steady light on to improve your visibility in the traffic in front, back and lateral sides.

INTERMITTENT MODE

In case of fog on limited visibility, the intermittent flashing will help you to be more visible to other drivers.

AUTO ON/OFF FUNCTION

If the helmet does not move for more than 60 seconds, the system goes into "deep sleep" mode. The system is completely turned on as soon as movement is detected. If the system is in "deep sleep" mode for more than 3 days, it turns off completely. To switch it back on, you need to press the function key.

EMERGENCY STOP SIGNAL

INTERMITTENT LIGHT

POSITION LIGHT

ESS III CAPSULE

ESSIII LED CAPSULE

Historical device from our N-Com collection, ESS III gives to the rider extra visibility in poor light condition or during braking. More visibility for more safety.

MODULAR
N 120 - 1

Experience maximum versatility with our flip-back helmet made from Lexan™ polycarbonate. The N120-1 benefits from years of expertise in modular helmet design, featuring a unique backward rotation of the chin guard enabled by a single pivot mechanism that ensures maximum reliability. Effortlessly switch between full-face protection and open-face freedom, adapting perfectly to your needs and the type of ride you're undertaking. The N120-1 combined with the N-Com system is certified UN/ECE 22-06. 100% Made in Italy.

N 100 - 6

In line with Nolan's successful tradition of modular helmets, the N100-6 incorporates the latest technical innovations in flip-up design. Ideal for long rides, it offers the comfort and protection of a full-face helmet combined with the freedom of an open-face. The durable shell, made from Lexan™ polycarbonate, provides strong impact protection. The adjustable sunscreen (VPS) shields you from the sun, while the Airbooster system ensures excellent airflow to keep you cool. The N100-6 is ready to accommodate the N-Com system, allowing you to stay connected with friends or enjoy your favorite music on the road. The N-100 and N-Com combo is certified UN/ECE 22-06. 100% Made in Italy.

N20-2 VISOR

Enjoy your daily city commute in style, safety, and comfort with the new N20-2 Visor jet helmet. Its contemporary design strikes the perfect balance between modern aesthetics, practicality, and understated elegance. Crafted from high-strength Lexan™ polycarbonate, the shell offers essential protection, while the integrated visor shields your eyes from wind, insects, and splashes. The N20-2 Visor delivers the ideal combination of open-face freedom and enhanced protection, ensuring a more enjoyable ride through city streets. Key features include a comfortable inner lining, adjustable ventilation, a quick-release buckle, and an integrated sun visor to reduce glare. With full compatibility with our N-Com communication system, you'll stay connected wherever your day takes you. Experience practicality, style, and safety—every day. 100% Made in Italy.

SAFETY

- Homologation UN/ ECE 22-06 (other homologation available - depending region)
- Durable Lexan™ polycarbonate shell is engineered to effectively absorb impact energy, helping to reduce the force transmitted to the rider's head
- Compatible with ESS III high visibility in case of low light situations or braking
- Ultrawide convex and scratch resistant visor protecting against wind, insects and splashing
- Vision Protection System sunscreen (VPS) - UV protection up to 400nm
- Multi-density EPS (expanded polystyrene) for impact energy absorption in different condition of temperature, speed (high & low) and type of surface
- Microlock² retention system for easy, precise and quick helmet fastening

COMFORT & FIT

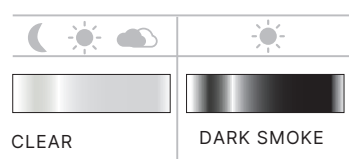

- Adjustable "AirBooster Technology" with large top air intake and large back extractor for optimum ventilation
- Innovative open mesh construction headset liner to offer extra ventilation on top of the head
- Soft Italian polyamide recycled fabric inner liner ally durability, softness and breathability
- Soft Italian polyester fabric on cheek pad for durability in abrasive areas
- Cheek pads with removable internal padding (washable without the padding)
- Patent pending adjustable sun visor extension (3 positions) to set up the sun visor depending shape of the nose

PERFORMANCE

- Ready for and certified with N-Com Bluetooth+ and N-Com Mesh™
- Dark smoke visors available (spare part)
- Vortex generator on the visor edge for noise reduction when visor open
- Weight: 1200g +/- 50 (Classico Nero – size M – ECE 22-06)
- Made in Italy: design, developed and produced in Brembate di Sopra; BG

JET
N20-2

When you're lucky enough to ride through the city or along scenic roads—perhaps on an island where a scooter is your only way to move around with ease—the perfect companion for comfort and style is the new N20-2 jet helmet, a model defined by its contemporary design and essential features. Its high-strength Lexan™ polycarbonate shell provides reliable protection on the road, while the open-face design maximizes your field of vision, letting you fully enjoy the view around you. A comfortable interior, adjustable ventilation, quick-release buckle for ease of use, and an integrated sun visor to reduce glare make the N20-2 a practical and safe choice for everyday riding. 100% Made in Italy

N-COM MESH

The N-Com Mesh™, engineered in partnership with Sena, leverages cutting-edge Mesh and Wave technologies to provide unparalleled group communication. Connect with an unrestricted number of participants across significant distances, ensuring every rider stays in touch. Plus, maintain full mobile connectivity for your music, phone calls, and GPS.

INTERCOM

- Open Mesh™ intercom mode : unlimited participants
- Private Group Mesh™ intercom up to 24 riders
- Rider to rider communication up to 800 m (range increased in group communication)
- Compatible with all Mesh™ intercom power by Sena
- Compatible with Wave technology (Geolocation-based intercom) to communicate with no range limitations

PHONE

- 2 external devices management
- Speed dial - 3 phone numbers memorized
- VOX phone: Vocal answer to call
- Compatible with N-Com Easyset app for easy set up, pairing and update

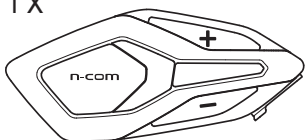

MULTIMEDIA

- Listen music from phone via Bluetooth®
- Audio multitasking to listen music while having Mesh intercom
- GPS indication from phone or external device via Bluetooth®
- Connection to bike audio system

ADDITIONAL FEATURES

- Waterproof
- Maximum battery life 15h (Fast charge 2.5h)
- Advanced noise control
- Auto off: automatic turn off after 5 minutes during which no Bluetooth® connections are active
- Optimized and ECE22.06 homologated as Specific Accessory for pre-set Nolan helmets
- HD speakers

ESS III

ESS III is the presence and braking warning system that allows the motorcyclist greater visibility on the road. Thanks to the LED positioned on the back of the helmet, ESS III emits light signals both when braking and in low light situations. The system is applicable to most helmet models on the market and installation is quick and simple, thanks to the adapters supplied.

HIGH VISIBILITY:

- Braking light mode: flashing light in case of braking
- Position light mode: steady light on to improve your visibility in the traffic
- Intermittent light mode: visibility when fog or limited visibility

ADDITIONAL FEATURES

- Auto On/Off: automatic on/off management through accelerometer
- Low battery signal

B101 R

B101 R is the communication system for motorcyclists who want to stay connected in a simple and secure way by offering essential functions on short or daily journeys. Thanks to Bluetooth® technology, the B101 R allows you to receive and make phone calls, listen to your favorite music and follow the instructions of the navigator inside the helmet, maintaining concentration while riding (one external bluetooth source at the time). The Auto OFF function also facilitates the use of the system, automatically turning off the device in the event of no active Bluetooth® connections, thus avoiding battery consumption. B101 can be connected to only 1 external Bluetooth source at a time.

- Connection to phone via Bluetooth®
- Listen music from phone via Bluetooth®
- GPS indication from phone via Bluetooth®
- Connection to bike audio system
- Auto off: automatic turn off after 5 minutes during which no Bluetooth® connections are active
- Low battery signal
