Basic tool set VAS 275 001

After a long selection procedure, Volkswagen has decided to start a collaboration with Sonic Equipment. Especially for Volkswagen Sonic has developed 2 toolboxes, based on the S9 and S12 toolbox. These toolboxes will be delivered in the Volkswagen RAL colors and can be supplied with foam inlays specially developed for Volkswagen. The range consists of a basic tool set in foam inlays and additional extension sets for Audi, VW and body. These products are exclusively available at Volkswagen and their distribution centers.

829113 - BRAKE BLEEDER WRENCH SET 6PT 6-PCS

- Built in socket (6 point) and wrench
- Socket sizes 7, 8, 9, 10, 11, 12mm
- 1.2M silicon hose with check valve
- Ideal for bleeding brake and hydraulic clutch systems

These specialist brake bleeder wrenches are designed to simplify brake bleeding and the additional ease of access will in many cases let the operator bleed the brakes without removing the road wheels. Clean and lubricate the bleed valve then fit the wrench over it; the wrench's internal seal and built-in socket fits snugly over the valve. The bleed tube is then fitted onto the nipple that is built into the wrench. Thus the wrench can be turned and repositioned without any fear of dragging against the bleed tube, or separating the bleed tube from the valve. Six sizes of wrench are supplied in the set, to cover most popular applications: 7-8-9-10-11-12mm all color-coded for easy identification. Ideal for both brake and clutch hydraulic systems, the wrench set is supplied in a sturdy blow-mould case with internal foam to keep the wrenches and tube secure and tidy.

829111 - WHEEL HANGER SET, 5-PCS

- Wheels becoming larger and more unwieldy, these wheel hanger pins simplify the wheel installation process by holding the rim centred on the hub as you hand screw in the wheel bolts
- Ideal when fitting wheel spacers: aligns the bolt holes, spacer and wheel together
- Particularly useful when replacing the brake discs - the wheel hanger pin ensures that the holes in the new disc are perfectly aligned with the holes in the wheel hub. Then the disc securing screws can be fitted with the wheel hanger pin in place
- The four most common thread and pitch sizes are included plus wheel stud version for hubs with wheel studs

DESCRIPTION

808001 - SLIDE HAMMER PULLER SET

This most useful tool can pull flange-type rear axles, remove stubborn oil seals & bearing or press-fit parts. Use as a dent puller or lip puller, reversible jaws can be set up for 2/3 jaw in-external usage, 1/2"-20 thread adaptor expands the slide hammer for extra pulling functions.

Sonic special tools

47401 - BALL JOINT SEPARATOR (JAW 20MM)

47402 - BALL JOINT SEPARATOR (JAW 20MM)

- For splitting track-rod ends, anti-toll bar mountings, ball joints, etc.
- Jaw open: 20mm

47403 - BALL JOINT SEPARATOR (JAW 22MM)

- Suits most cars and lighttrucks ball joints in steering & suspension
- 2-stage, 30-50mm
- Jaw open: 22mm

47404 - BALL JOINT SEPARATOR (JAW 22MM)

- For splitting track-rod ends, anti-toll bar mountings, wheel-hub ball joints, etc.
- 2-stage, 50-80mm
- Jaw open: 22mm

48307... - REVERSIBLE PULLER

- Jaws grip tighter as more pressure is applied
- Reversible jaws
- Drop forged
- Alloy steel
- Hardened 45° hrc

ART. NO.	DESCRIPTION	SPECIFICATIONS

820019 - MULTI-PURPOSE SYRINGE 500ML

820018 - 2 MEGAPIXELS WIFI ENDSCOPE WITH LED OD 5.5MM CAMERA 8-PCS

This endoscope is a must have for the modern service and diagnostic mechanics.

- This rechargeable endoscope can be connected with your smartphone or tablet through its own WiFi-connection
- Camera diameter is 5,5mm and is equipped with adjustable LED-lighting
- With the record button, video's and or pictures can be made of inspected objects
- The camera can be supported with a mirror, which allows angle inspection
- The camera can also be equipped with a hook or magnet so objects can be removed directly from inspected areas
- Length of flexible camera probe is 3,5m
- The 2.0 megapixel camera is protected according to IP68

47242 - PROFESSIONAL CAR SHEET COVER, MULTI USE

- Nylon with elastic band
- Wash on 40 degree
- Black with white Sonic logo

48104 - FENDER PROTECTOR WITH SUCTION CUPS

- Length: 106,5cm
- Width: 64cm
- Weight: 380gr

47570 - NON SLIP WING & GRILL COVER

- The issues arising of using magnetic wing covers can now be prevented by our new non slip wing cover
- The wing will protect the vehicle against scratches and damage
- Washable at 40°C
- Oil, grease, dirt and water repellent
- Meets national and international fire safety standards
- Size: 90 x 50 cm (wing cover)

47571 - FENDER PROTECTION SYSTEM

- Protects the vulnerable areas of the bodywork (front grill, fender, headlights, car make badges, bumper, ...) during general service, inspection, mobile airco service,...
- Universal vehicle fit: one size fits all - from mini to estate
- Unique wheel access: allows maintenance on brakes, suspension
- Front lamp section with nylon mesh allows light testing without overheating
- Radiator section with nylon mesh allows stationary motor testing without the risk of overheating
- Unique removable protective fabric panel (washable) to prevent rubbing/damage when the mechanic leans onto the engine bay
- Comes in a convenient storage bag
- Backside made of 420D nylon, antislip. Attach with elastic loops.

48105 - CREEPER

- Length: 100cm
- Width: 48cm
- Height: 11,5cm
- Wheels also loose available; article number 48105W

48126 - PNEUMATIC ROLLER SEAT, 5 WHEELS

Adjustable height 375-495mm

4821901 - MULTI PURPOSE PAN BLACK, 20 LITER

- Pan volume 20 ltr.
- Drain spout
- Loop for pulling and hanging up the pan
- Dimensions approx. 685 x 667 x 65mm (L X W X H)

4821902 - MULTI PURPOSE PAN BLACK, 50 LITER

- Pan volume 50 ltr.
- Drain spout
- Dimensions approx. 800 x 600 x 100mm (L X W X H)

48112 - HEAVY DUTY OIL DRAIN PAN 15.9 LITER

For professionally changing of motor oils, cleaning of parts or collecting other liquids. This drain pan includes a nozzle for easy pouring of the contents. With three grips this drain pan is comfortable to use.

- Easy pouring no mess spout
- Convenient front and rear handles
- 15.9 liter
- Extra thick quality

818003 - BELT GAUGE

- This tensioning gauge can be used to adjust the tension on the cam belts where the movement of the timing belt is measured by load
- Suitable for use on cam belts with various belt thickness
- Clear incremental marking with knurled knob for precise measurement
- Dual scale allows reading from top or bottom of tool

487001 - MAGNETIC TRAY 4", 15CM

487002 - MAGNETIC TRAY 4", 15CM

818001 - CLUTCH ALIGNER SET, 15-28MM

As a result of parallel expansion technique it is possible to align the clutch plate to the pilot bearing in the crankshaft flywheel. For clutch-hub-Ø15 - 28mm

815002 - MAGNETIC BOWL, DIAMETER 150MM

818008 - CLUTCH ALIGNMENT TOOL SET, 38-PCS

Tool set for professional dismantling and assembly of self adjusting clutches. Prevents plate distortion which may prevent the clutch from disengaging of cause dragging. Consists a refitting tool, allowing the clutch adjuster to be wound back, and six alignment adaptors.

818002 - OXYGEN SENSOR WRENCH

- 6 pt. wrench 22mm with flexible head
- 250mm
- Suitable for heated and unheated oxygen sensors
- Cut-out section allows socket to pass over wiring
- Suitable for VW, Audi, BMW, Mercedes, Ford, Opel/Vauxhall, Peugeot, Citroën, Renault, Seat, Skoda, Japanese cars

810005 - OXYGEN SENSOR SOCKET 1/2", 22MM

Extra long, slitted version for deeply ingrained oxygen sensors, suitable for:

- BMW, Ford, Mercedes, Opel, VAG, etc.
- 150mm, 22mm

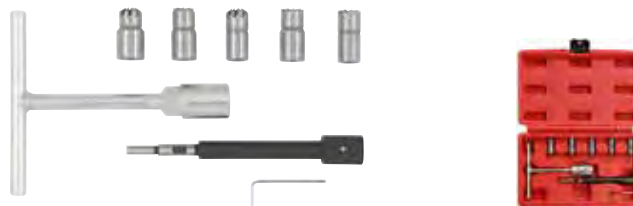

829003 - DIESEL INJECTOR EXTRACTOR WITH ADAPTORS

Essential set to remove injectors from the cylinder head professionally.

ART. NO.	DESCRIPTION
829003-01	Empty case 829003
829003-02	Foam 829003
829003-03	Air hammer extractor
829003-04	(A) diesel injector adaptor - Siemens
829003-05	(B) diesel injector adaptor - Denso
829003-06	(C) diesel injector adaptor - Siemens
829003-07	(D) diesel injector adaptor - High Pressure M12
829003-08	(E) diesel injector adaptor - Delphi
829003-09	(F) diesel injector adaptor - Off-line
829003-10	(G) valve seat removal tool - Denso [1.43usd]
829003-11	(H) M16 denso adapter
829003-12	(I) dual connection adaptor - Bosch
829003-13	(J) Bosch injector dismantling tool

818004 - DIESEL INJECTOR SEAT CLEANER SET 7-PCS

Set of five diesel injectors seat cleaners a centering pilot and T-handle. Use to clean/decarbonise injector seats when changing injectors. Helps to avoid blow-back due to poorly seated injectors.

ART. NO.	DESCRIPTION
818004-1	T-handle
818004-2	Pilot post
818004-3	15mm flat reamer
818004-4	17mm flat reamer
818004-5	17mm angled reamer
818004-6	17mm x 19mm flat reamer
818004-7	17mm x 21mm angled reamer

805012 - INJECTOR/INJECTOR-EXTRACTION TOOL SET

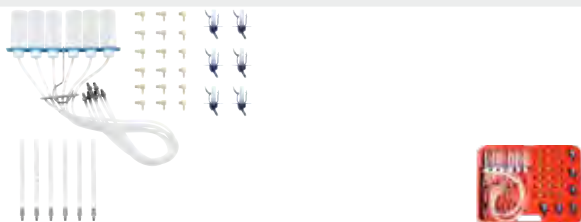

Specially for VW/Audi/Seat/Skoda, suitable for
 - SDI-/TDI- und TFSI- diesel engine (also pump/nozzle and common rail)
 - FSI gasoline engines
 For the professional dismantling and installation of injectors/injection valves as well as the unit pump nozzle. The striking weight also enables the removal of jammed elements.

818009 - COMMON RAIL FLOW METER SET

- To measure return fuel flow on diesel vehicles up to 8 cylinders fitted with common rail injection system
- Determination of the runback volume via glass tubes or measurements cartridges
- Includes 8 glass tubes, 8 measurements cartridges with connecting lines, mounted on an aluminum bar

819005 - COMMON RAIL FLOW METER SET

- To measure return fuel flow on **diesel** vehicles up to 6 cylinders fitted with common rail injection system
- Determination of the runback volume via glass tubes or measurements cartridges
- Includes 6 glass tubes, 6 measurements cartridges with connecting lines, mounted on a aluminum bar

818011 - OIL PRESSURE TEST SET

Tests oil pump pressure and also low oil warning devices. Ø75mm gauge fitted with heavy duty cover. Fitted with quick coupling adaptors and 1200mm hose. Includes 90° coupling adaptor for limited access applications.

818010 - MASTER COMPRESSION TEST SET

A comprehensive set for testing the compression on diesel vehicles. Features 600psi gauge with large rubber bumper, straight and right angled quick connect fittings and an extensive range of spark/glow plug and injector adaptors.

- Spark plug sizes: 10, 12, 14, 18mm
- Glow plug adaptors: Alfa Romeo, BMW, Chrysler, Citroën, Daewoo, Fiat, Ford, Honda, Hyundai, Isuzu, Jeep, Kia, Lada, Lancia, Land Rover, LDV, Mazda, Mercedes, MG, Mitsubishi, Nissan, Peugeot, Renault, Rover, Saab, Ssangyong, Suzuki, Toyota, VAG, Vauxhall/Opel, Volvo
- Injector adaptor: M20, M22, M24 & Ford Stanadyne injectors plus clamp-on injectors

818016 - CAMSHAFT & CRANKSHAFT LOCKING SET, 19-PCS

Anodized aluminum chocks suitable for locking camshaft pulleys on twin cam engines. Allows the service easier and reduce the risk of incorrect valve timing from taking place. Set includes flywheel locking tools for selected PSA (Citroën/ Peugeot) and GM (Vauxhall/Opel) petrol and diesel engines. Suitable for a range of vehicles including: Ford, Honda, Land Rover, Rover, VW, Renault, Citroën, Peugeot, Fiat and Vauxhall/Opel.

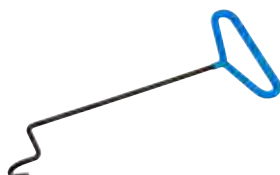

ART. NO.	DESCRIPTION
818016-1	A. camshaft setting and locking plate
818016-2	Q. balancer shaft locking pin
818016-3	D. crankshaft tdc location pin
818016-4	N. camshaft locking pins (5.0mm, pair)
818016-5	P. camshaft locking pins (6.8mm, pair)
818016-6	K. flywheel holding tool
818016-7	M. flywheel holding tool
818016-8	B. camshaft locking tool
818016-9	C. camshaft locking tool
818016-10	D. camshaft locking tool
818016-11	E. camshaft locking tool
818016-12	F. camshaft locking tool
818016-13	G. camshaft locking tool
818016-14	H. camshaft locking tool
818016-15	I. camshaft locking tool
818016-16	J. camshaft locking tool
818016-17	L. camshaft locking tool

819009 - CYLINDER PRESSURE METER SET

Quick connect/disconnect feature allows one gauge to be used with variety of quick adaptors for most popular diesel engines. Push pressure scale: 0->1000PSI 0->70 Bar

47815 - DOUGHNUT STRETCHER

For removing the retaining rubbers on exhaust systems

826001 - VACUUM PUMP SET

For universal use, for building up pressure and vacuum. Complete with hose and various couplings in a case. Ideal for brake and clutch bleeder and to bleed the fuel system as at (ISA) V6 TDI engines as well as for testing.

- Vacuum cells e.g. on air-conditioning systems
- Turbochargers etc.
- Vacuum - 0,8 bar
- Pressure - 4 bar

818014 - RADIATOR PRESSURE TEST SET, 17-PCS

- Testing range 0-2,5 bar
- Suitable for all standard vehicles

818017 - TOOTH BELT TOOL SET, 3-PCS

- Set for working and locking the tooth belt tensioner rolls
- Timing belt tensioner pins-OEM Nos T10115, T40011 and serpentine tension pin-T10060/A.
- For use on: Lupo, Polo 1.4 TDi PD Golf, Bora, Polo 1.9 TDi PD, Beetle, Sharan 1.9 TDi PD, Passat 1.9 TDi PD, Audi A2 / A3 1.4 / 1.9 TDi PD, A4 / A6 1.9 TDi, A4 / A6 / A8 / Allroad 2.5 V6 TDi.

818015 - PETROL ENGINE COMPRESSION TEST SET

Compression tester fitted with Ø63mm gauge reading up to 300psi and 20kg/cm². Set includes 130mm straight and angled push-on connectors, 400mm flexible extension with 10, 12, 14 and 18mm adaptors.

47816 - FITTING HOOK

Perfect for the removal and fitting of springs on brakes, headlights, motorbike mufflers and much more. The bent shape of the fitting hook allows a free view of the fitting spot.

820006 - AXIAL JOINT TOOL SET, 30-45MM

- For fast and professional changing of the axial joints of cars
- Automatic clamping of the joint heads
- Easy assembling of long tie rods because of open construction
- Saves up to 3 hours of working time
- For joint heads Ø30-35mm, Ø35-40mm and Ø40-45mm

ART. NO.	DESCRIPTION
820006-1	Axial joint tool
820006-2	Joint heads Ø30-35mm
820006-3	Joint heads Ø30-40mm
820006-4	Joint heads Ø40-45mm

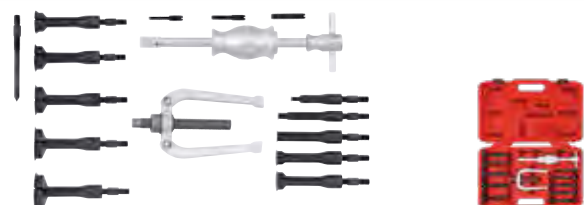

819001 - NUT BREAKER SET, 4-PCS

- For the splitting of seized and/or overtightened nuts without damaging the thread
- Flat round head design allows tool to be used in inaccessible areas drive to prevent binding under load
- Does not damage the bolts threads

ART. NO.	DESCRIPTION
819001-1	5/16" - 1/2" (9-12mm)
819001-2	1/2" - 5/8" (12-16mm)

110001 - SPRING COMPRESSOR, 1800KG

Apart from being competitively priced, Sonic spring compressor is one of the most user-friendly coil spring compressors on the market, making dismantling of McPherson struts safer, easier and much faster compared to using a traditional tool. Sonic spring compressor is supplied with two sets of standard jaws which work efficiently with the springs on approximately 90% of all cars.

- Handles approximately 90% of all cars
- High quality coil spring compressor used by thousands of professionals
- Supplied with two sets of standard jaws
- Built-in protective accessory

SONIC BOOSTERS

Designed for intensive
& professional use.

Boosters

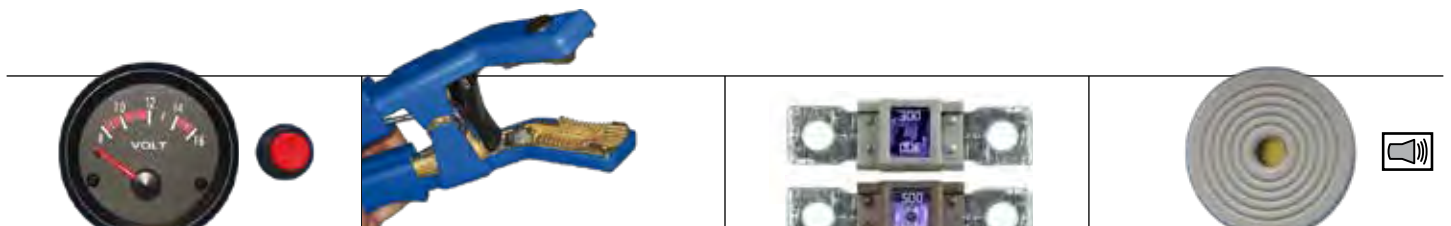

Sonic Booster
START ENGINE USE SONIC BOOSTER

The Sonic booster range offers professional and reliable solutions for all users. In terms of power, our range starts where other competitors end theirs. Our least powerful batteries deliver more power than most average batteries of competing products. Don't be misled by booster and battery ratings! When it comes to jump starting vehicles, what really matters is the power in Cranking Amps (CA), not in Peak Amps (PA). In addition to powerful AGM batteries, our boosters are all equipped with high-quality components which are also very important: double-insulated starting cables, fully insulated clamps with curved and bronze jaws, resistant Anderson connectors, etc. The Sonic boosters are professional tools designed for professional and intensive use.

CABLES: Sonic starting cables are double insulated, extra-long, extremely flexible and of very high conductivity. Cables of other boosters are tiny and that's why they make knots inside and break.

CASE: The single-piece moulded case in polyethylene of 5mm, unbreakable and with a lifetime warranty assures excellent resistance to shocks and intensive uses. Cases of other boosters are slim and made out of 2 parts. So it's fragile and more difficult to handle when you have to repair.

VOLTMETER: The Sonic booster uses a traditional voltmeter with a needle where other competing products use LED lights to show the charging level. The voltmeter indicates the precise charging level and can be used to test the proper functioning of the alternator of the vehicle. The battery of a booster must reach 13V when it's recharged and when it's connected to the car-battery. The engine must reach 14,4V because that's the power your car alternator must produce.

CLAMPS: The massive clamps of the Sonic booster are fully insulated and ergonomic with big opening and a braided copper strap in order to spread current through both jaws. Clamps from other boosters are less user-friendly and don't deliver full current through both jaws. They are also less robust.

FUSES: The internal fuse protects the batteries against short-circuits and overcharge (overuse).

BUZZER: A buzzer that produces a tone will inform you of an inversion of polarity, in option for the 12V Sonic models.

- Read manual first
- Charge the Sonic booster completely before use
- To ensure long life and optimize the use of the Sonic booster battery, you must put the Sonic booster on continuous charge after each use using the automatic provided charger
- When not using the Sonic booster for long period of time, recharge the unit (using the original automatic electric 230V AC charger) every 3 months for at least 48hrs
- When using the Sonic booster to start an engine, do not cranc for more than 8-10 seconds, and wait for a futher 3 minutes before a second attempt
- Never completely discharge the Sonic booster battery
- Never recharge the Sonic booster using a 24V recharging (cigarette lighter) plug on board of a vehicle

48109 - 12/24V-2400/1200CA

SPECIFICATIONS

Gasoline or diesel, light truck, agricultural service, heavy truck, bus, tank, plane, boat, etc. Perfect for starting engines up to 1500HP which have been stationary for a long time, in extreme temperature conditions from -30° to +60°C, without batteries. Practical example: capable to start a 1500HP 38 litres, Mercedes Leopard tank without batteries

48110 - 12/24V-3200/1600CA

SPECIFICATIONS

Gasoline or diesel, light truck, agricultural service, heavy truck, bus, tank, plane, boat, etc. Flexible 12V or 24V for extreme use, 25% more power than the 12/24V-2400/1200CA unit. Perfect for starting engines up to 1500HP which have been stationary for a long time, in extreme temperature conditions from -30° to +60°C, without batteries.

48111 - 12/24V-1600/800CA

SPECIFICATIONS

- Gasoline or diesel, utility, 4x4, second-hand and agricultural service, heavy truck to start diesel engines in 24V up to:
- 500HP as booster
- 250HP as substitute battery

48149 - GIGA LITHIUM 12V/800CA

48152 - DOCKINGSTATION FOR 48149

SPECIFICATIONS

- Battery: Lithium LiFePO4 (4 cells)
- Cranking Amps: 800CA
- Cables: pure copper, 50cm/10mm²
- Battery charger: automatic 12V 1.3A
- Digital display with LED indicators
- Full protection against reverse polarity, short circuits, overvoltage, overcharge, overtemperature, overdischarge
- Equipped with a memory saver function
- Heavy duty clamps
- Weight: 2,5kg
- Dimensions: 260 x 135 x 72mm

For whom performance really counts

POWER: outcome from the aero space technology, the batteries in the Sonic Booster (AGM/MF, pure lead, made in USA) have an extraordinary energy storage and delivery at very high currents.

ELECTRONIC PROTECTION: the Sonic booster is no danger for the electronic equipment of the vehicles. These jump starters have done millions of startings without any damage (Certificate of AXA insurance policy - NO file has been opened in more than 20 years).

LIABILITY: all the components of the Sonic booster have been selected worldwide for their very high quality for an intensive use dedicated for professionals:

The moulded single-piece polyethylene body of 5 mm, unbreakable (life time warranty), assures excellent resistance to the shocks and everyday uses. Does not take much space in a recovery service vehicle and its ergonomic shape facilitates its use and storage.

The Radaflex® starting cables (double isolation) extra-long, are extremely flexible and of very high conductivity. They allow the user to leave the booster on the ground while starting the vehicle. The electronic automatic charger with continuous current, manages and maintains the battery in perfect condition in order to give full power at start. The recharging cord through cigarette-lighter (DC/DC) allows a quick recharge on board of a 12V vehicle.

Warranty
All users benefit from a one-year warranty on components and workmanship.

Propulstation®

The Propulstation® is a real revolution in the world of jump starters. Developed for all professionals, it makes the emergency start of all vehicles even easier and more efficient! The unique docking station of the Propulstation® allows an automatic and optimal recharge of the booster in recovery vehicles but also in garages and workshops.

THE BATTERY: This is the heart of the device. Therefore, Sonic batteries have been designed with the main focus on delivering a maximum power at start. The battery has exceptionally high capacity to accumulate and disperse high-amperage energy. It uses pure lead plates and is an AGM (absorbed glass mat) type battery, outcome of aerospace technology and offers far superior performance and durability. Waterproof and dry, it can be stored in any position in perfect safety.

THE HOUSING: robust shell case design 5 mm shatterproof polyethylene ensures a high level of shock and daily use resistance. With a lifetime guarantee and modern esthetics that will always remain stylish and discrete thanks to its sober color.

THE CABLES: long and flexible with a double insulation, they have a cross-section capable of delivering the batteries full power. They offer a perfect resistance to extreme conditions. (-30 °c to 60 °C)

THE CLAMPS: the Propulstation® has robust, wide-opening clamps which are fully insulated and have a copper trace carrying the current to both of the bronze jaws and protecting the powerful spring against over-heating.

VOLTAGE DETECTION SYSTEM AND CORRECT CONNECTION SIGNAL: a LED system indicates the voltage to select on the booster. It reduces the risk of misuse while using a 12/24V booster. In the case of misuse any build up of gas will be evacuated. The LEDs also indicate if the booster is correctly connected to the station. If it is the case, the LED corresponding to the voltage of the charging circuit is lit on.

THE FUSE: the fuse is directly accessible from the outside of the booster. A spare fuse is available on the side of housing. A blue LED indicates the correct functioning of the fuse. If it does not light up when pushing on the red button, the fuse is blown.

UNIQUE ON THE MARKET CLAMPS: the massive clamps of the Sonic booster are fully insulated and ergonomic with big opening and a braided copper strap in order to spread current through both jaws. Clamps from other boosters are less user-friendly and don't deliver full current through both jaws. They are also less robust.

THE CONTACTOR: it revolutionizes and makes the storing of the booster in its station easier. Thanks to the powerful magnets, the booster is guided at its place avoiding any risk of bad connection. The contactor ensures an optimal recharge of the booster and avoids any movement while stored in the vehicle.

Propulstation®, when it's stored, it's charged!

07

5 ASSETS

ALWAYS IN THE RIGHT PLACE

In the workshop, the booster has its place and any user knows where to find and store it. In the vehicle, it is perfectly set in the station.

ALWAYS CHARGED AT 100%

Stored in its station, the booster is automatically and optimally charged between two starts.

100% SUCCESSFUL STARTS

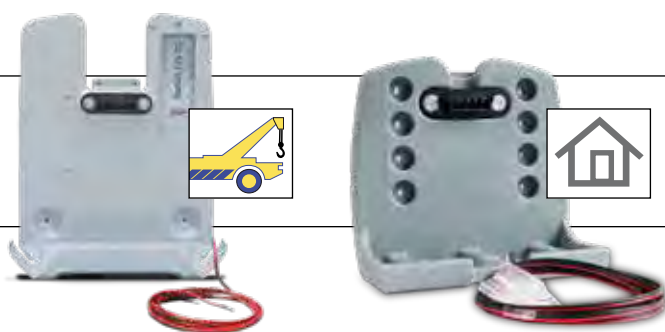

Always at its maximal capacities, the booster ensures 100% successful starts.

A 3 TIMES LONGER LIFETIME

The optimal charge of the Propulstation® avoids the irreversible battery sulfation which is caused by the battery voltage dropping below 12,4V and will lead to premature failure of its battery.

ABSOLUTE PLEASURE OF USE

The user will benefit from the unlimited pleasure of working with a reliable and efficient tool.

DOCKING STATION IN 2 VERSIONS

VEHICLE: the vehicle station must be connected to the recovery vehicle's battery by the DC/DC 12V/12V (or 24V/24V) lead. This has a one-way diode that prevents the breakdown vehicle from discharging the booster. The lighting and other equipment on the breakdown vehicle are heavy current consumers

WORKSHOP: the workshop station has a 230V/12V AC/DC charger to connect to the mains. Due to the weight of the portable booster 12/24 and 24V it is advised to mount the station on the floor.

PROPULSTATION® MOBILE THE POWER THAT ROLLS!

LARGE WHEELS: provide easy mobility on the most difficult terrain.

A THIRD WHEEL MULTIDIRECTIONAL: equipped with a brake ensures manoeuvrability and immobilization of the booster on an inclined surface.

ERGONOMIC HANDLES: designed to facilitate the movement of the booster in inclined and vertical positions, by pulling or pushing it.

Propulstation®

THE PROPULSTATION HAS TWO ELEMENTS:
 1) powerful start booster for professional use
 2) charging station

The fixed docking station will automatically charge the Propulstation® which results in an optimized power supply.

Accu-smart®

Battery charger - multi stage charging

Did you know that your batteries suffer from self-discharge? Lead batteries get discharged even without being used! The loss of capacity can reach up to 6% per month (at 20°C) and even more by higher temperature. Yet below 12,4V, lead batteries start to sulphate. The more one battery is discharged and the longer it stays discharged, the more sulphate covers the lead plates inside. This sulphate will corrode the lead and damage the battery irreversibly. Moreover, contrary to other types of batteries, lead batteries do not suffer from memory effect and must be charged as often as possible. Ideally, the recharge must

be permanent and done with an electronic automatic charger. Accu-Smart® is therefore the essential tool for professionals and private users having vehicles stopped. These are a few examples:

- Old timer cars and motorbikes
- Agricultural and garden vehicles
- Leisure vehicles, motor homes
- Boats
- Vehicles in showrooms in stock or on parking lots
- Rental vehicles
- Mountain vehicles

829095 - HIGH PRESSURE FUEL PUMP PULLER DIESEL FORD - TDCI - TRANSIT 2.2

As of 2011 Ford changed the method of fuel pump sprocket removal on the 2.2 TDCI (Puma) diesel engines. The sprocket no longer has threaded holes which means the legs of the puller used to remove the sprocket must be hooked in shape. The K00286 puller allows the removal of these sprockets by allowing the high pressure diesel injection pump to be pushed out of the pump sprocket to enable pump removal without disturbing the timing chain. Special note: To perform this task the 829095 must be used with Ford special tool 303-1151 (sprocket holding tool).

Note: The 829095 kit contains a force screw. Force screws must be lubricated with high pressure grease. Sonic recommends the use of molybdenum disulphide grease (drive shaft grease). Do not use assembly or anti-seize greases (copper greases).

Equivalent to OEM 303-249, 303-249-01

MERCEDES

829124 - TIMING CHAIN FITTING BRIDGE - MERCEDES BENZ

The Mercedes-Benz M651 1.8 | 2.1 diesel engines can suffer from issues requiring the replacement of the timing chain. The M651 timing chain is at the back of the engine (flywheel end) which makes the replacement of the timing chain difficult. To avoid the need for completely stripping the engine the new chain must be attached to the old chain and "threaded" around the engine sprockets while turning the crankshaft. The 829124 Timing Chain Fitting Bridge helps guide the new chain into position while the old chain is extracted by maintaining the contact of the new chain with the sprocket. Note: the 829124 must be used with the cam locking tools found in 829120 M651 engine timing kits.

829122 - VIBRATION DAMPER HOLDING TOOL - 1,8/2,0 TFSI/TSI

A comprehensive kit used for dismantling and assembling the vibration damper on the applications listed. The vibration damper fitted to the VAG 1.8 | 2.0 TFSI | TSI engines is held in place by a single central bolt. The pulley clamps the crankshaft timing chain sprocket against the end of the crankshaft, there is no traditional key way and the sprocket is not supported by the crankshaft. If the pulley bolt is removed without using the 829122 the crankshaft chain sprocket can easily separate from the crankshaft causing the timing position to be lost. The 829122 is an essential kit required to maintain the engine timing when removing the front vibration damper and should be used whenever the vibration damper is removed for instance when replacing the front crankshaft oil seal. N.B. for replacement of the camshaft drive chain additional tooling will be required - see Sonic Equipment 829066 Engine Timing Kit. The 829122 can also be used on earlier engines as the VW tool T10531 replaces the older tool T10368.

COMPONENTS

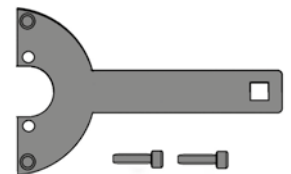

REF	ART. NO.	OEM	DESCRIPTION
1	4880382	T10531/1	Vibration damper holding tool
2	4880383	T10531/3	Crankshaft sprocket holding tool adapter

VAG - AUDI - VOLKSWAGEN

829123 - CRANKSHAFT HOLDING TOOLS WRENCH - VAG

The 829123 has been designed to hold the crankshaft pulley while loosening or tightening the crankshaft centre bolt. The tool has a short handle for easy storage with a 1/2" D square to allow use with a power bar to extend the effective handle length. Double sided tool for tightening and loosening the fixing bolts.

Warranty conditions

Definitions

The following definitions apply in the warranty conditions:

End User: the natural or legal person who has purchased a Product from a Sonic Retailer for personal use, without the intention to sell the Product to third parties or install it at the premises of others.

Products: all goods, usage rights and other proprietary rights of (the label) Sonic which are sold via authorised Sonic Retailers and destined for End Users.

Sonic: Sonic Equipment BV, a private company with limited liability, registered in Purmerend, the Netherlands, and with its place of business at Component 114, 1446 WP Purmerend, the Netherlands (Chamber of Commerce No. 37113345) and its affiliates.

Sonic Retailer: any sales outlet of a natural or legal person exercising a profession or business, and which is authorised by Sonic to sell Products to End Users as a reseller of Sonic Equipment BV.

Sonic Warranty: the warranty in these Warranty Conditions for End Users of Products.

Warranty Conditions: these warranty conditions of Sonic Equipment BV which apply to Products of Sonic that are sold to End Users through authorised Sonic Retailers.

Definitions can be used in both singular and plural, without loss of substantive meaning.

General

Sonic only supplies Products through Sonic owned channels and Sonic Retailers. Products are manufactured for intensive and professional use. All Products are manufactured and put together with the utmost care, and they undergo the most stringent quality and production controls. Nevertheless, problems with material and/or workmanship may arise. The Sonic Warranty only warrants defects in workmanship or materials that prevent their use and to the extent set out in these Warranty Conditions. The Sonic Warranty does not include any right to indemnification or compensation in any form whatsoever. Sonic is and shall not be liable for any incidental, special or consequential losses, costs or damages.

The Warranty Conditions do not affect mandatory legal warranty obligations in any way.

Warranty:

The length of the warranty is always dependent on the Product concerned, and is specified in the Catalog and/or on the Sonic website. The warranty commences when the End User purchases the Product. The Sonic Warranty is only valid upon presentation of proof of purchase of the Product with clear date of purchase, and subject to registration of the Product to the extent required. The Sonic Warranty for storage systems is only valid if the storage system is properly registered on the Sonic website. The Sonic Warranty is not transferable and only valid for the End User who directly purchases a Product from a Sonic Retailer. It is not valid for subsequent users. The End User must report to the Sonic Retailer when making a claim under the Sonic Warranty.

If Sonic considers that a Product is covered by the Sonic Warranty, it will repair or replace the Product at its sole discretion, taken into account the duration of the use of the Product. Replaced Products become the property of Sonic. If a Product is no longer in Sonic's

range, Sonic may at its sole discretion supply a similar Product or provide a refund by means of a voucher.

Any work performed under warranty must be carried out by Sonic. The shipping costs for assessing the Sonic Warranty must be borne by the sender. The Sonic Warranty covers parts, labour and return to sender. Replaced and repaired Products are also covered by the Sonic Warranty. The length of the Sonic Warranty is not extended or renewed if parts are replaced, repaired or supplied.

Sonic regularly changes and improves various Products according to market demands and/or improvements in technology. Products listed in the Catalog are subject to changes of both a technical and visual nature, without further notice. Sonic reserves the right to make changes in design, construction or technology at any time without incurring any obligation in incorporating such changes in Products of Sonic previously sold or sent for repair.

Length of the Warranty

Sonic offers four warranty options in addition to the legal warranty. Unless specified otherwise, the Sonic Warranty is for a period of 10 years.

SG3: This warranty is for a period of 3 years.

SG2: This warranty is for a period of 2 years.

SG1: This warranty is for a period of 1 year.

SGX: These items have no warranty.

Warranty exclusions
